

# Course Design Document

Course Code	
Course Name	Python

Duration (in days)	15	Proficiency Level	Fundamental
Pre-requisites	None	Target Audience	Campus Hires

## Learning Outcome

At the end of the program, participants will learn:

- To read and write simple Python programs
- To develop Python programs with conditionals and loops
- To define Python functions and call them
- To use Python data structures — lists, tuples, dictionaries
- To do input / output with files in Python

## Day wise Session Plan

Day	Unit	Objectives	Hours
1	Introduction to Python and Computer Programming	<ul style="list-style-type: none"> <li>• Python – Introduction</li> <li>• OOPS basics</li> </ul>	8
2	Data Types, Variables, Basic Input-Output Operations, Basic Operators	<ul style="list-style-type: none"> <li>• Your first program</li> <li>• Python literals</li> <li>• Operators - data manipulation tools</li> <li>• Variables - data-shaped boxes</li> <li>• How to talk to computer?</li> </ul>	8
3 & 4	Boolean Values, Conditional Execution, Loops, Lists and List Processing, Logical and Bitwise Operations	<ul style="list-style-type: none"> <li>• Making decisions in Python</li> <li>• Python's loops</li> <li>• Logic and bit operations in Python</li> <li>• Lists - collections of data</li> <li>• Sorting simple lists - the bubble sort algorithm</li> <li>• Lists - some more details</li> <li>• Lists in advanced applications (List comprehension)</li> </ul>	16
5 & 6	Functions, Tuples, Dictionaries, and Data Processing	<ul style="list-style-type: none"> <li>• Writing functions in Python</li> <li>• How functions communicate with their environment?</li> <li>• Returning a result from a function</li> <li>• Scopes in Python</li> <li>• Tuples and dictionaries (deep on dictionary methods and data extraction in looped dictionary)</li> <li>• Special sequences, Sets</li> </ul>	16
7 & 8	Modules, Packages, String and List Methods, and Exceptions	<ul style="list-style-type: none"> <li>• Using modules</li> <li>• Some useful modules</li> <li>• What is package?</li> <li>• Errors - the programmer's daily bread</li> <li>• The anatomy of exception</li> <li>• Some of the most useful exceptions</li> <li>• Characters and strings vs. computers</li> <li>• Python's nature of strings</li> <li>• String methods</li> <li>• Strings in action</li> </ul>	16

9 & 10	The Object-Oriented Approach: Classes, Methods, Objects, and the Standard Objective Features; Exception Handling, and Working with Files	<ul style="list-style-type: none"> <li>• Basic concepts of object programming</li> <li>• A short journey from procedural to object approach</li> <li>• Properties</li> <li>• Methods</li> <li>• Inheritance - one of object programming foundations</li> <li>• Exceptions once again</li> <li>• Generators and closures</li> <li>• Processing files</li> <li>• Working with real files (All types of file handlers)</li> </ul>	16
11	Regex	<ul style="list-style-type: none"> <li>• Regular expressions</li> <li>• regex Functions</li> <li>• Regex Methods</li> <li>• Regex Metacharacters</li> </ul>	8
12 & 13	External Libraries	<ul style="list-style-type: none"> <li>• Requests Library (For Rest API Automation)</li> <li>• Subprocess</li> <li>• Time</li> <li>• Powershell script(basic)</li> <li>• Paramiko Library (For SSH Automation)</li> <li>• Selenium web driver (Page object module)</li> </ul>	16
14	Testing Framework	<ul style="list-style-type: none"> <li>• Robotframework</li> <li>• Robotframework-sshlibrary</li> <li>• Robotframework-seleniumLibrary</li> </ul>	8
15	Data serialization (with JSON and Objects)	<ul style="list-style-type: none"> <li>• Parse JSON - Convert from JSON to Python</li> <li>• Python read JSON file</li> <li>• Convert from Python to JSON</li> <li>• Writing JSON to a file</li> <li>• How to store/extract data in object</li> <li>• Serialization with Objects</li> </ul>	8
